CAREER OBJECTIVE

Recent Computer Science graduate looking to use my skills in a junior developer position. Experienced in developing web apps with the MERN stack and adaptable enough to pick up new skills rapidly and efficiently. Ideally would like a work environment where I can work with experienced developers and learn from them.

EDUCATION

Stony Brook University, New York — *B.S in Computer Science*
September 2016 - May 2020

Relevant Coursework: Operating Systems, Analysis of Algorithms, Software Engineering, Database Systems, Principles of Programming Languages

PROJECTS

SMPL
https://smpl-board.herokuapp.com/

A simple image board created with the MERN stack and AWS S3. Users can create new threads, upload images alongside text posts, and reply to posts in threads.

Bull-Flagger
https://bull-flagger.herokuapp.com/

A web app for stock traders to search for and filter stocks based on monthly consolidation. The app uses the MERN stack along with a python script that scrapes the web daily to update stock information in the database.

Shield Hero
https://the-shield-hero.firebaseapp.com/

A 2d WebGL video game developed with a remote team of 3 on a tight deadline. We used the Phaser 3 game engine, coded the game in typescript, and used Gulp to transpile our code to javascript for debugging purposes.

SKILLS

Adept:

Javascript

React

HTML

CSS

Node.JS

Express

Mongoose

Git

Familiar:

Python

Java

C

TypeScript

SOFT SKILLS

Adaptability

Communication

Teamwork

Work ethic
